SAE 2.3 Mettre en place une solution informatique pour l'entreprise

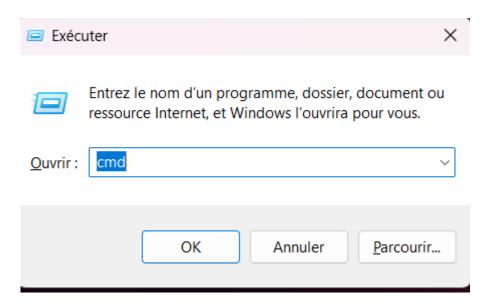

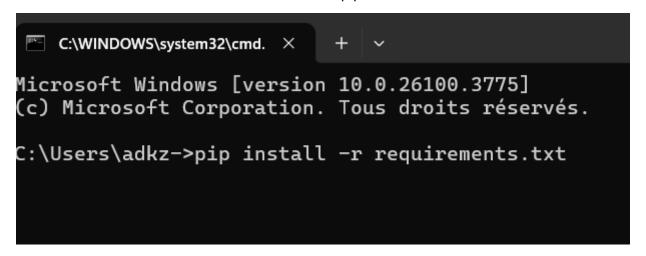

Installation tutorial

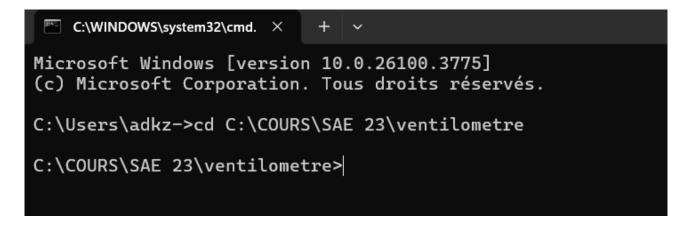

I. First, open your control terminal in administrator mode.

Then Install pip first

II. Then cd "path where app.py is located".

III. Then do cd "path where there is app.py "Once in the right path do python reset_db.py

```
C:\WINDOWS\system32\cmd. × + ∨

C:\COURS\SAE 23\ventilometre>python reset_db.py

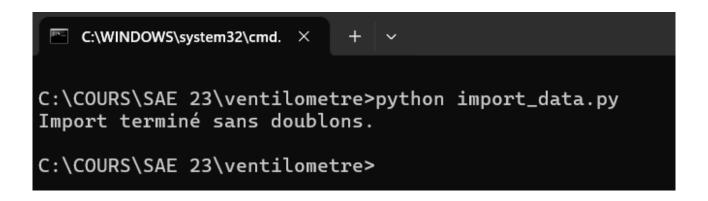

Ancienne base supprimée.

Nouvelle base créée avec toutes les colonnes.

Import terminé avec groupes et résidences.

C:\COURS\SAE 23\ventilometre>
```

IV. Then note python import_data.py

V. Then run python collect_wind.py (this will take some time).

VI. And finally, make python app.py

```
C:\COURS\SAE 23\ventilometre>python app.py

* Serving Flask app 'app'

* Debug mode: on

WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.

* Running on http://127.0.0.1:5000

Press CTRL+C to quit

* Restarting with stat

* Debugger is active!

* Debugger PIN: 999-774-507
```

VII. Then CTRL+click on the address http://127.0.0.1:5000 directly from the command terminal.
